Strength. Performance. Innovation.

Punch press tooling just got **more productive**, **more durable** and **more affordable**. Introducing **EXP™ punch technology** from Wilson Tool International®, the first tooling in the industry to offer a standard holder with **truly universal punches**.

Another innovative product from the experts in punch press tooling, EXP punch technology for thick turret punch presses **increases productivity**, **reduces manufacturing waste**, **saves storage space** and delivers the same performance, grind life and durability as our ground-breaking HP punch press tooling at a **lower cost**.

Make the Switch to Universal Punches.

Why replace an entire punch assembly when all you need is a different punch? The revolutionary EXP technology makes it practical and cost effective to only replace the punch.

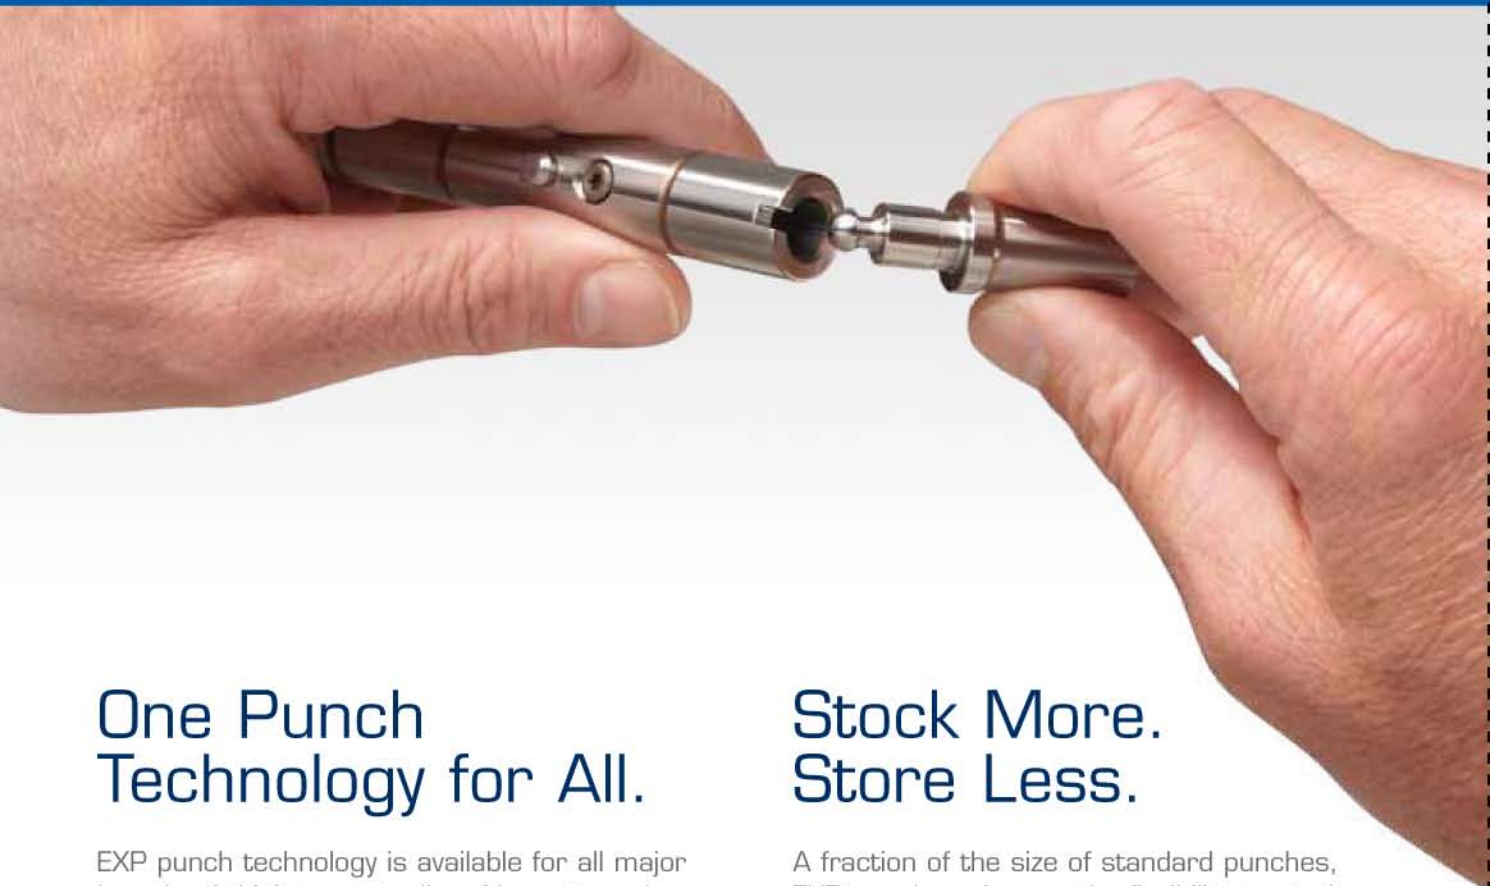

Wilson Tool offers EXP punch holders designed to fit in all styles of A and B station thick turret assemblies. Simply replace your current punch with the EXP punch holder and you're ready to use the EXP punch. EXP punches can be ordered in a vast array of configurations, including rounds, shapes and specials to suit virtually any need.

Set Up Four Times Faster.

EXP punch technology offers the fastest setups in the industry. Switching between punches is up to four times faster than changing traditional punch press tooling.

Loading EXP punches is as easy as pushing a universal punch into the punch holder, then turning the key to lock it in place. To remove a punch, simply turn the key to unlock and pull the punch out of the holder. Switching from one punch to the next can be done in seconds, significantly reducing downtime.

One Punch Technology for All.

EXP punch technology is available for all major brands of thick turret tooling. No matter what type of thick turret tooling you use, EXP punch technology is fully compatible with all current guide assemblies.

For shops that run more than one type of thick turret tooling, EXP punch technology eliminates the need to buy punches from multiple manufacturers. Instead, you'll be able to stock a greater selection of punches that can be used throughout your shop.

Better Tool Steel for Longer Tool Life.

No other punch press tooling offers longer tool life than EXP punch technology. Every EXP punch is manufactured with Wilson Tool's exclusive Ultima™ premium tool steel to increase wear resistance. As a result, EXP punches have twice the tool life as most standard punches.

Stock More. Store Less.

A fraction of the size of standard punches, EXP punches give you the flexibility to stock more shapes, using less space for storage. With a smaller footprint required for storage, your operators can increase productivity by keeping the punches they need close at hand.

Expect More for Less.

EXP punch technology is quite simply better tooling for less money. Because EXP punches require significantly less material and produce less waste, manufacturing costs are reduced. We're able to pass those savings on to you. A lower punch price combined with faster setups, stronger tool steel and greater versatility makes EXP punch technology the best value for your money.

PRECISION TOOLING. UNBEATABLE PERFORMANCE.

For more than 40 years, Wilson Tool International® has provided industry-leading tooling solutions that enhance the performance of sheet metal fabricators and stampers worldwide.

The three divisions of Wilson Tool – Punching, Press Brake and Stamping – represent the most comprehensive line of tooling systems and accessories available. Our ability to consistently provide innovative, high-quality products that outlast and outperform the competition is why the world's most successful fabricators rely upon Wilson Tool tooling systems.

A knowledgeable global sales force, multilingual customer support staff, same-day shipping and extensive distribution network are just a few of the benefits that keep our customers coming back time and again.
