DURADIE

Slitting, complex shapes, clusters & close to clamps

... DuraDie is the perfect solution to all these jobs

- **Slitting Solution**

This is a special die holder assembly which provides you with the ideal slitting solution. The die inserts are fully supported by the die base and are hard wearing and economical to replace.

- **Problem Solving**

The Duradie assembly is also the perfect solution when you are punching complex two dimensional shapes and cluster patterns with small webs between holes. In fact the Duradie system can help whenever die strength is an issue.

- **Shock Resistant**

The aperture (which closely follows the profile in the die insert), is cut into the shock resistant die holder which fully supports the special die blade and the specially located shims.

- **Durable**

With a die insert made using Ultima™, a special powdered tool steel, you will get more hits between regrinds and reduced downtime.

- **Practical and Economical**

The complete assembly consists of a special die insert, a shim pack and a specially reinforced die holder. You can order duplicate die inserts for different materials and if you need to replace a worn die all you need is a new insert.
