

INTRODUCING THE... 10 STATION ID STAMP

The 10-Station ID Stamp can be used to mark punched components using your Trumpf-Style 10-Station Multi-Tool.

The tool uses a special set of 10 embossing character punches. The standard font size is 4mm and the tool is designed for use in materials up to 8mm thick.

A variety of punches can be chosen, 0 - 9 is standard with other special characters available on request.

The 10 Station ID Stamps are all manufactured from **Ultima Tool Steel** boosting the resistance for demanding applications that require long term wear and toughness.

The Ultima steel improves the tool life when punching abrasive materials with high tensile strength.

Examples of use of this application are:

- Part Identification
- Company Names
- Logos
- Signs

Description (Punch, Die & Stripper)	Size	Cat. No.
0 - 9 Punch Set	4mm	26253
